

Simple strategy

- Looking for yield – to fit that category of my investments
- **Goal:** Protection from market downturn at 5% plus yield in quality

My Bet

- Dividend Secure
- Position Size – 1,000
- When to purchase
52 week low = \$42
52 week high = \$64
- Purchase price - \$42 (But I'm Conservative)

Sell puts

January – strike price \$40

Premium - \$2.50

Total premium = \$2,500

- Cost base

If Sold \$37.50 if the stock is put (sold to me)

Dividend yield 5.7%

If Not I keep the premium PLUS My money has been earning interest (1% per annum)
